📍 Ibadan, Nigeria

## PROFESSIONAL SUMMARY

Software developer with 3+ years of experience as a Web2 frontend specialist and Web3 full-stack developer. Expert in crafting responsive, user-centric interfaces for traditional applications while building end-to-end decentralized solutions including smart contracts and frontend integrations. Dedicated to creating secure, scalable applications, with exceptional user interfaces that seamlessly bridge Web2 and Web3 ecosystems.

## EDUCATION

University of Ibadan | 2018-2024

Agricultural Economics

- Relevant Coursework: Econometrics, Statistics, Microeconomics, Macroeconomics, Agricultural Finance, Research Methods, Quantitative & Quantitative Analysis
- Developed strong quantitative and analytical skills through data-driven projects and economic modeling

## PROFESSIONAL EXPERIENCE

Bethel Labs | June, 2025 - October, 2025

Frontend Developer

- Collaborated with back-end developers to consume APIs, ensuring robust data flow and real-time interactivity in applications.
- Translated design specifications into fully responsive, accessible web interfaces through designer collaboration.
- Utilized frameworks like React, Next.js, to build scalable, component-driven applications with optimized state management and dynamic rendering.
- Elevated user experience by introducing new features.
- Managed multiple projects simultaneously while meeting strict deadlines
- Implemented advanced techniques and engineered cross-device compatibility.

Orglobal Tech Network | June, 2024 - May, 2025

Frontend Developer

- Developed and maintained user-facing web applications ensuring accuracy and functionality
- Collaborated with team members to troubleshoot and resolve technical issues
- Demonstrated strong attention to detail in code review and quality assurance processes
- Utilized problem-solving skills to debug and optimize application performance
- Maintained detailed documentation of development processes and system changes
- Mentored junior and beginner level developers in frontend development.

## SKILLS

- **Web3 Full-stack Development:**
  - Smart Contract writing: Solidity, Hardhat, Foundry, .
  - integration: GraphQL, Wagmi, WalletConnect, Thirdweb sdk, RaindowKit
  - frontend: JavaScript (ES6+),React.js,Next.js, Supabase, vite, Tailwind CSS, Viem.js,Ethers.js
- **Web2 Frontend Development:** JavaScript (ES6+),React.js,Next.js, supabase, vite, Tailwind CSS, Framer motion
- **Technical documentation & Code review**
- **Version Control (Git)**

- **Soft Skills:** Strong communication, teamwork, eagerness to learn financial reconciliation processes
  - **Data Analysis:** Excel, STATA, SPSS
-

---

## CERTIFICATIONS

- Bachelor of Science in Agricultural Economics, University of Ibadan
- 

## ADDITIONAL INFORMATION

- Languages: English (Fluent)
  - Committed to professional development
- 

## KEY STRENGTH

- **Analytical Thinking:** Strong ability to break down complex systems, understand code architecture, and analyze technical requirements to design effective solutions
- **Attention to Detail:** Proven track record of writing clean, bug-free code with consistent adherence to coding standards and best practices
- **Problem-Solving:** Skilled at debugging issues, optimizing performance bottlenecks, and architecting scalable solutions to technical challenges
- **Quick Learner:** Able to rapidly master new programming languages, frameworks, and development tools while adapting to evolving technology stacks
- **Integrity:** Committed to maintaining code quality, following security best practices, and adhering to ethical development standards
