

IYANUOLUWA OWOSENI

Frontend & Web3 Full-Stack Developer

08038756068 | jesulobaowoseni1@gmail.com | Ibadan, Nigeria | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend and Web3 full-stack developer with 3+ years of experience building responsive, user-centric interfaces and end-to-end decentralized applications. Skilled in React, Next.js, and Solidity/Soroban smart contracts, with a track record of shipping production features, mentoring junior developers, and bridging Web2 and Web3 ecosystems. Open to Web2 frontend and Web3 full-stack roles where I can apply my strong problem-solving, UX-focused engineering, and mentoring experience.

PROFESSIONAL EXPERIENCE

Frontend Developer June 2025 - October 2025

Bethel Labs

- Built and shipped responsive, accessible web interfaces across 3 products in React and Next.js, translating design specs into production code with designers and back-end engineers.
- Integrated REST APIs to power real-time data flow, ensuring reliable interactivity across all 3 products.
- Redesigned and simplified site navigation and UI so users could find what they needed without assistance, then built an internal analytics dashboard to track engagement and performance and get direct feedback on the change.
- Managed 2 concurrent projects under strict deadlines, running cross-device testing that surfaced and resolved numerous UI bugs across mobile and desktop.

Frontend Developer June 2024 - May 2025

Orglobal Tech Network

- Developed 2 and maintained 3 user-facing web applications, ensuring accuracy and functionality across production releases.
- Debugged and optimized application performance, identifying and resolving key bottlenecks to improve responsiveness.
- Participated in peer code reviews within a 3-person team, catching bugs and quality issues before deployment and documenting process changes.
- Mentored about 5 junior and beginner-level developers in frontend fundamentals, accelerating their onboarding to production-ready contributions.

SKILLS

- Web3 Full-Stack:** Solidity, Hardhat, Foundry, Soroban; Wagmi, WalletConnect, Thirdweb SDK, RainbowKit; Viem.js, Ethers.js
- Frontend:** JavaScript (ES6+), React.js, Next.js, Vite, Tailwind CSS, Framer Motion
- APIs & Backend:** REST APIs, GraphQL, Supabase
- State Management:** Redux, Zustand
- Data Analysis:** Excel, STATA, SPSS
- Others:** Git, technical documentation, code review, cross-functional collaboration; English (fluent)

RELEVANT PROJECTS

Nullius - Zero-Knowledge Reputation Layer for Stellar Payments

Prototype privacy-preserving reputation system for on-chain payments, implementing wallet authentication and smart contract interaction end-to-end. GitHub: github.com/Plain-labs/Nullius

Proxima - AI Agent Registry & Autonomous Payment Gateway (Stellar/Soroban)

Prototype on-chain registry enabling autonomous AI agents to transact via a Soroban payment gateway; applied for open-source contributor funding through Stellar ecosystem grants. GitHub: github.com/Plain-labs/Proxima

EDUCATION

B.Sc. Agricultural Economics 2018 – 2024

University of Ibadan

- Coursework: Econometrics, Statistics, Microeconomics, Macroeconomics, Agricultural Finance, Research Methods. Built quantitative and analytical skills through data-driven research and economic modeling.

CERTIFICATIONS

- Full-Stack Web3 Development Bootcamp - Web3Bridge (June-October 2025): 4-month intensive program covering blockchain development, Solidity smart contracts, and full-stack dApp development.
- Software Development Certificate of Completion - Digital Skillup Africa (DSA), November 2025.
